### Enter.

At the current stage of socio-economic development of our country, ensuring stable and rapid economic growth is the main issue of the national development strategy. The economic reforms implemented in our republic for the effective development of a stable and socially oriented economy are showing positive results today.

The positive results achieved in the socio-economic development of our country, as well as the establishment of modern networks and production facilities based on the modernization of the economy, as a result of which the economic potential of our country is significantly increasing, the types of products and services created are increasing, quality is fundamentally improving, our economy is gaining a new meaning and essence.

According to the results of the budget of our country in 2022, gross domestic product - 5.7 percent, industrial products - 5.2 percent, construction works - 6.6 percent, agricultural products - 3.6 percent, market services - 15, 9 percent, export - 23.6 percent, retail turnover - 12.3 percent growth rates were provided.

**Analysis of literature on the topic.** In our article, the issue of the distribution of the state budget in sectors and its analysis is raised. For this purpose, studies were carried out based on the articles of M.Q. Pardaev, M.E. Polatov, J.R. Zaynalov, M.M. Mukhammedov, I.S. Tukhliev, D.Kh. Aslanova.

**Research methodology.** As a result of the conducted research, the expenditures of the country's budget were compared to previous years as a result of the information and analyzed.

### Analysis and results.

State budget expenditures in 2022 amounted to 236.5 trillion soums, an increase of 26 percent (188.3 trillion soums) compared to last year. 117.7 trillion soums or 50% of the total expenses were spent from the State budget to finance social expenses. About 40 percent of the expenditures (91.4 trillion soums) were used to finance the salaries and equivalent payments of employees working in budget organizations.

More than 19.4 trillion soums were allocated from the State budget for expenses related to the payment of social payments. 11.4 trillion soums of these funds were financed to pay allowances, material assistance and compensation payments to families living in our Republic. In addition, 11.1 trillion soums were transferred from the state budget to the off-budget Pension Fund and 5.2 trillion soums were allocated to expenses related to compensation for losses caused by the difference between the purchase and sale prices of natural gas. Subsidy funds were allocated.

A total of 22.1 trillion soums have been allocated from the republican budget, based on the social and production infrastructure development program and the relevant tasks of the Government.

A total of 855 billion soums of subsidies were paid under the mortgage program. 515 billion soums were allocated to 17,293 citizens to cover a part of the initial contribution, and 340 billion soums were allocated to 28,090 citizens to cover a part of the mortgage loan interest payments received in previous years.

By the end of the year, the Consolidated budget was executed with a deficit of 3.9 percent of the GDP or about 35 trillion soums. This year, 1.5 trillion soums of budget funds were allocated within the framework of the initiative budget process, and at the same time, the 3rd stage of the process, i.e. "voting" for the projects, has come to an end. At this stage, a total of 33,680 projects from 9,452 neighborhoods across the country were voted for the initiative budget program.

The expenditure section of the Ministry of Finance includes a lot of social expenses, foreign debt servicing and other expenses. The 2022 state budget expenditures in Uzbekistan were approved as follows.

59. Strategic Reforms Agency - 35,814.9 billion soums
60. Family and Women's Committee - 92,782.2 billion soums
61. Academy of Arts - 114,404.4 billion soums
61. Other organizations - 35,962,585.9 trillion soums

### **Conclusions and suggestions.**

First of all, it is important not to forget that these expenses, in addition to being considered as a function of the state, also serve for the welfare of the population and the development of social infrastructure. In recent years, measures aimed at strengthening and developing the material and technical base of higher education institutions are incomparable. Of course, this will serve to optimize the directions and specialties of training highly qualified personnel, to further improve state education standards, and to build, reconstruct, capital repair and equip educational and laboratory buildings, sports facilities, and student residences. is reflected in the programs addressed to We should not forget that the modern scientific research laboratory established in all educational institutions can help prevent and treat pandemics that are occurring on a global scale in the current conditions. In addition, budget costs are allocated for the design and construction, reconstruction and equipment of facilities.
